

Jay Buckby

Junior Cloud Engineer

About Me

I believe myself to be an organised, self-motivated, and flexible individual. Confident and upbeat in nature, with a keen eye for detail. I like to treat every job as if it were my own, I'm always willing to go the extra mile. I can be a supportive person in a team, or an assertive voice of reason for a leader, I'm committed to creating a good environment by developing positive working relationships with colleagues. I'm a good communicator at all levels and able to follow both written and verbal instructions. Dedicated to personal development and always willing to learn.

Key Course Skills

HTML5, CSS3, SASS, JavaScript, React, Jest, React Testing Library, CI/CD, OOP, Java, Spring, node, Jenkins, AWS & Packer, Terraform, Docker & Kubernetes, GCP and Provisioning with Vagrant.

Project Overview

Spring Boot Project

A properly architected and documented API following all modern design patterns, built using Spring and deployed using GCP.

Java Project

A Java Object Oriented application making use of multiple models and classes to run complex game logic from the command line.

React API Project

A React application that pulls data from an external public API and presents it in a dashboard or multipage layout.

JavaScript Game Project

A browser-based game using modern JavaScript programming techniques and DOM manipulation.

HTML/ CSS Portfolio Website

Built using correct version control and modern coding standards, and deployed live using a CI pipeline.
